

**GUARDIAN COMMENCES FIELD OPERATIONS
ON A NEW PIPELINE AND FACILITY TO REINSTATE 300+ BOE PER DAY
AT KOTCHO FIELD**

CALGARY, ALBERTA (February 12, 2008)

Guardian Exploration Inc. ("Guardian" or the "Company") (TSXV:GX), is pleased to announce that it has commenced field operations on a pipeline and facility to produce gas into a plant operated by a large independent at its Kotcho Lake field in North Eastern British Columbia.

This project will be reinstating the cash flow on Guardian's 300+ barrels of oil equivalent (boe) per day at the Kotcho field. Due to problems at the original third party facility, Guardian had been forced to suspend cash flow from gas production for over one year. With the completion of this new pipeline Guardian will be able to put this field back into production.

Over the last few months, the Company had investigated and engineered an alternative system to provide consistent access to market the Kotcho Lake production. Guardian looks forward to recovery of productivity in this field, and the corresponding cash flow in the near future.

Guardian is a Calgary-based corporation engaged in the acquisition, exploration and development of resource properties. Common shares of the company trade on the TSX Venture Exchange under the trading symbol "GX".

The term barrels of oil equivalent ("BOE") may be misleading, particularly if used in isolation. In accordance with NI 51-101, a BOE conversion ratio of six thousand cubic feet per barrel (6mcf/bbl) of natural gas to barrels of oil equivalence is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. All BOE conversions herein are derived from converting gas to oil in the ratio mix of six thousand cubic feet of gas to one barrel of oil.

Investors are cautioned that the preceding statements of the Corporation may include certain estimates, assumptions and other forward-looking information. The actual future performance, developments and/or results of the Corporation may differ materially from any or all of the forward-looking statements, which include current expectations, estimates and projections, in all or part attributable to general economic conditions and other risks, uncertainties and circumstances partly or totally outside the control of the Corporation, including natural gas/oil prices, reserve estimates, drilling risks, future production of gas and oil, rates of inflation, changes in future costs and expenses related to the activities involving the exploration, development and production of gas and oil hedging, financing availability and other risks related to financial activities. The Corporation undertakes no obligation to update forward-looking statements if circumstances or management's estimates or opinions should change. The reader is cautioned not to place undue reliance on forward-looking statements.
